

Curriculum Area	Teaching and Learning Focus Grade: Year 5 Teachers: Jodi Senn, Jake Doubikin, Kelly Marwick
English	During Literacy this term, students will be engaging in: • Our whole class reading approach that focuses on reading fluency using fluency pairs and varied engagement strategies, vocabulary development and building general knowledge • Focusing on the implementation of our new spelling program Word Origins* with a primary focus on morphological awareness and etymology. *Note: An evidence-informed program designed to provide spelling, reading and vocabulary instruction.
Mathematics	During Numeracy this term, students will be engaging in: • Developing their understanding of fractions and decimals. • Ordering unit fractions and decimals, accurately placing them on a number line to build their sense of number size and value. • Practising adding and subtracting fractions with the same denominator, using models and number lines to support their understanding of part-whole relationships. • Measuring and constructing angles using a protractor and formal units of measurement (degrees). • Calculating the perimeter and area of rectangles and using appropriate units of measurement to measure length, area, volume, capacity and mass. • posing questions to gather data and constructing displays appropriate for the data.
Visual Arts	During Visual Arts this term, students will be engaging in: • Exploring the enchanting world of “Under the Sea” as we delve into ocean-themed art. This theme has been specially selected in alignment with our school’s exciting opportunity to showcase a selection of student artworks at the Albany Entertainment Centre for the upcoming Albany Children’s Theatre production of <i>The Little Mermaid</i>. • Designing detailed underwater-themed creatures and bringing them to life using papier-mache, realistic painting techniques, and collage materials. • Exploring ideas and techniques in artworks inspired by marine life.
Health	During Health this term, students will be engaging in: • Promoting a safe and healthy lifestyle, looking at the guidelines for physical health for children, as well as the nutritional value of foods.
Physical Education	During Physical Education this term, students will be engaging in: • The skipping continuum and learning the fundamental movement skill that involves rhythmic movement. • Hockey skills will be supported by a hockey development officer. • Initial skill training and practice of individual events and team games for the Athletics carnival in Term 4.

Curriculum Area	Teaching and Learning Focus Grade: Year 5 Teachers: Jodi Senn, Jake Doubikin, Kelly Marwick
Music	During Literacy this term, students will be engaging in: • Our whole class reading approach that focuses on reading fluency using fluency pairs and varied engagement strategies, vocabulary development and building general knowledge • Focusing on the implementation of our new spelling program Word Origins* with a primary focus on morphological awareness and etymology. *Note: An evidence-informed program designed to provide spelling, reading and vocabulary instruction.
LOTE - Noongar	During Numeracy this term, students will be engaging in: • Developing their understanding of fractions and decimals. • Ordering unit fractions and decimals, accurately placing them on a number line to build their sense of number size and value. • Practising adding and subtracting fractions with the same denominator, using models and number lines to support their understanding of part-whole relationships. • Measuring and constructing angles using a protractor and formal units of measurement (degrees). • Calculating the perimeter and area of rectangles and using appropriate units of measurement to measure length, area, volume, capacity and mass. • posing questions to gather data and constructing displays appropriate for the data.
